Phoenix Integration Tech Note
MBSEPak 2.3.0 - Additional Configuration required when using Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5

Date: March 31, 2017
Product: MBSEPak 2.3.0
Severity: Medium

Introduction: MBSEPak 2.3.0 supports MagicDraw version 18.4 and 18.5. Additional configuration is required when using MBSEPak 2.3.0 with Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5.

Issue: The MBSEPak 2.3.0 installer will not complete successfully when using Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5. Additional configuration is required when using MBSEPak 2.3.0 with Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5.

Impact: Users will be unable to use MBSEPak 2.3.0 with Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5 without additional configuration.

Resolution:

Complete the following additional configuration steps to use MBSEPak 2.3.0 with Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5.

1. Install ModelCenter and Analysis Server.
2. Install Cameo Enterprise Architecture or Cameo Systems Modeler version 18.4 or 18.5.
3. Run the MBSEPak 2.3.0 installer.
4. When the MBSEPak installer wizard looks for the MagicDraw installation directory it will not find the correct installation directory. Manually select the Cameo Enterprise Architecture or Cameo Systems Modeler installation directory (for example: "C:\Program Files\Cameo Enterprise Architecture" or "C:\Program Files\Cameo Systems Modeler").
5. Finish running the MBSEPak 2.3.0 installer.
6. Use Windows Explorer to navigate to the 'bin' directory for Cameo (for example "C:\Program Files\Cameo Enterprise Architecture\bin" or "C:\Program Files\Cameo Systems Modeler\bin").
7. You will find a .properties file in that directory (for example "C:\Program Files\Cameo Enterprise Architecture\bin\cameoea.properties" or "C:\Program Files\Cameo Systems Modeler\bin\Cameo Systems Modeler.properties"). Make a copy of this file in the same directory and rename the copy "magicdraw.properties".
