A MODULAR SIMULATION PROCESS AND DATA MANAGEMENT SOLUTION
USING HYPERWORKS, MODELCENTER AND SIMDATA MANAGER

Presented by:
Carlos de Lima –Altair Engineering
April 17th 2018

ACKNOWLEDGMENT

Work developed and originally presented by:

- Ilya Tolchinsky – Phoenix Integration
- Albrecht Pfaff – PDTec
- Jean-Baptiste Mouillet – Altair Engineering

- Webinar: www.altairhyperworks.com

AGENDA

- Introduction
- Altair HyperWorks
- ModelCenter
- SimData Manager
- Workflow demonstration
- Conclusion

INTRODUCTION

Altair Partner Alliance Synergy

HyperWorks

- CAE simulation platform
- Modeling and Visualization
- Multiphysics Solver Technology

ModelCenter

- Advanced Process Integration
- Design Space Exploration
- Supports CAD parametrization

SimData Manager

- Simulation Data Management
- Traceability

ALTAIR SOLVER TECHNOLOGY

Structural
Analysis

Crash, Safety,
Impact & Blast

Thermal
Analysis

Magnetics

Multiphysics Analysis and Optimization

MULTIPHYSICS AND MULTI-DISCIPLINARY DESIGN

Most design processes need to take into account multiple physics

- Example: Cars
 - Structure (Vibration/ Crash/ Fatigue...)
 - CFD (Aeroacoustics/ Aerodynamic Characteristics)
 - High Frequency EM (Adas)
 - Low Frequency EM (Motors)
 - Electric Engines/ Batteries (E-mobility)

Physics Interact :

- Directly: Multiphysics
- Indirectly: Conflicting Requirements
 - Shared Design Variables
 - Optimization to find good compromises

MULTI-PHYSICS SOLUTIONS: COUPLING

- Sequential Coupling (Applied initial and boundary conditions)
- Modal Coupling (Component Mode Synthesis)
- Direct Coupling (Co-Simulation)

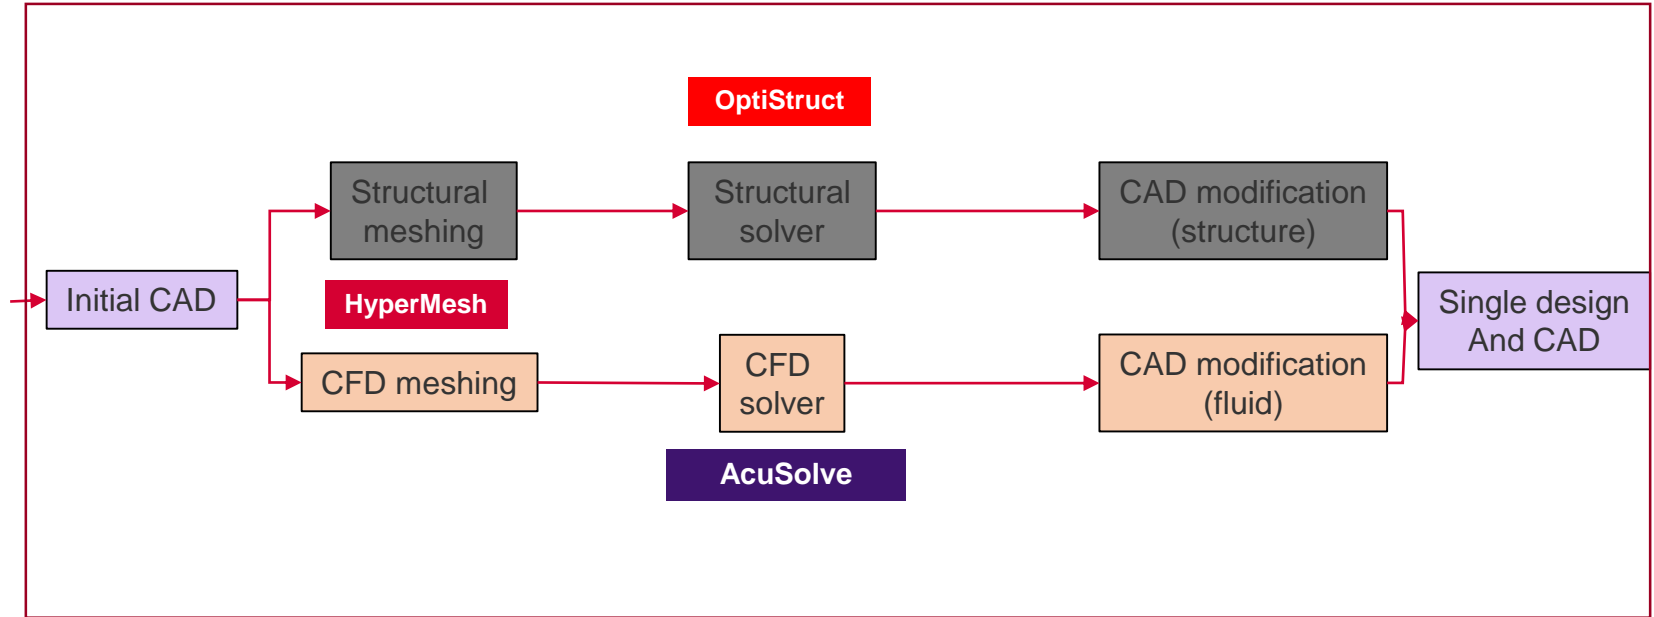

Thermal-Structure w/ OptiStruct

Aeroacoustics-NVH w/ OptiStruct

MULTIPHYSICS AND MULTI-DISCIPLINARY DESIGN

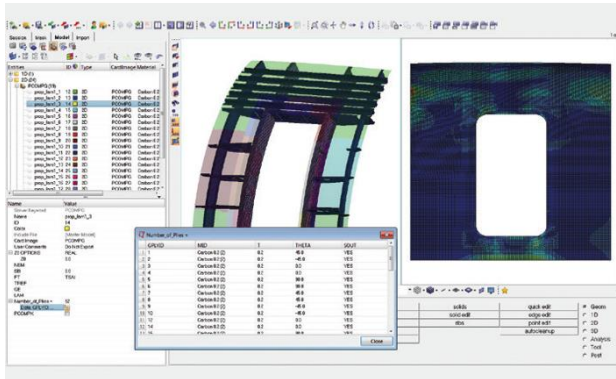

(Share design variables between physics)

HYPERMESH

Altair HyperMesh is a high-performance finite-element pre-processor that provides a highly interactive and visual environment to analyse product design performance.

With the broadest set of direct interfaces to commercial CAD and CAE systems and a rich suite of easy-to-use tools to build and edit CAE models, HyperMesh provides a proven, consistent analysis platform for the entire enterprise.

OPTISTRUCT

MODELCENTER

ModelCenter® Integrate

DRIVES PRODUCTIVITY

Accurately execute more simulations
in less time, with fewer resources »

ModelCenter® Explore

DRIVES INNOVATION

Understand the design space, make better
decisions, and find optimal solutions »

ModelCenter® MBSE Pak

ENABLES MBSE

Integrate your SysML architectural
model with engineering analysis tools »

MODELCENTER

AUTOMATE ANY SOFTWARE TOOL

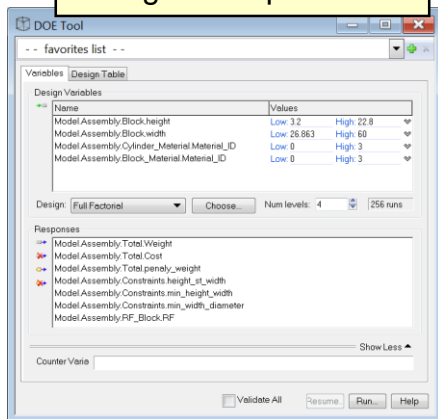

- Automate any software tool
 - Vendor neutral

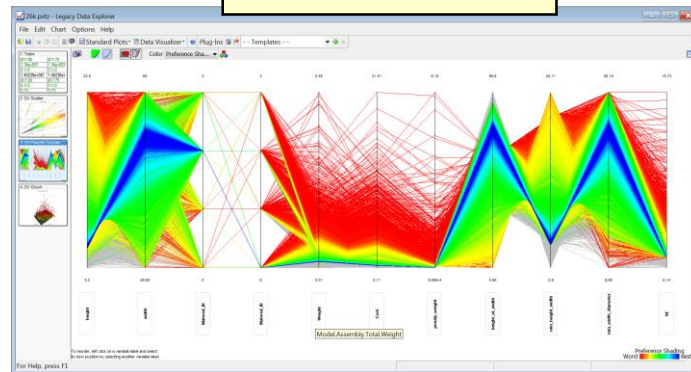

MODELCENTER

Design Of Experiments

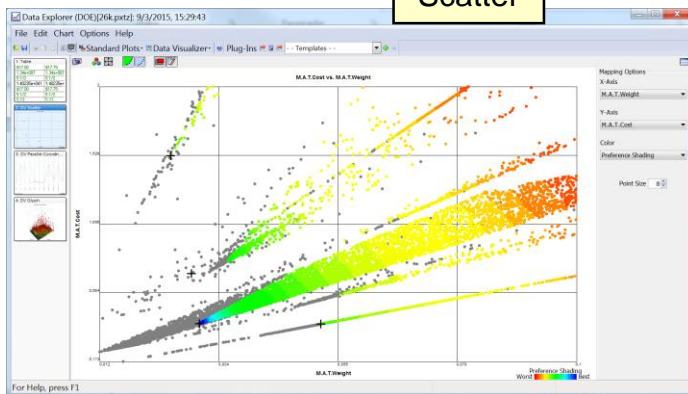

Parallel Coordinates

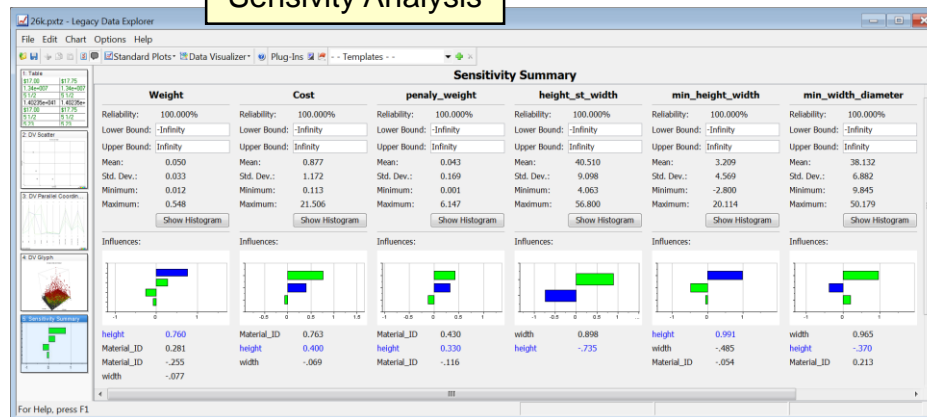

Optimization

Scatter

Sensitivity Analysis

- ✓ **MANAGE** the constantly increasing CAE data in a structured (IT) environment
- ✓ **SHARE** CAE data across multiple teams, disciplines, locations, suppliers,...
- ✓ **LINK** CAD & CAE data for simultaneous development
- ✓ **MAP** CAD models to CAE assemblies
- ✓ **RE-USE** FE-models, minimize redundancy
- ✓ **TRACK** and trace the CAE data, simulation results, variants, versions,...
- ✓ **AUTOMATE** simulation process (e.g. reporting)

PDTEC

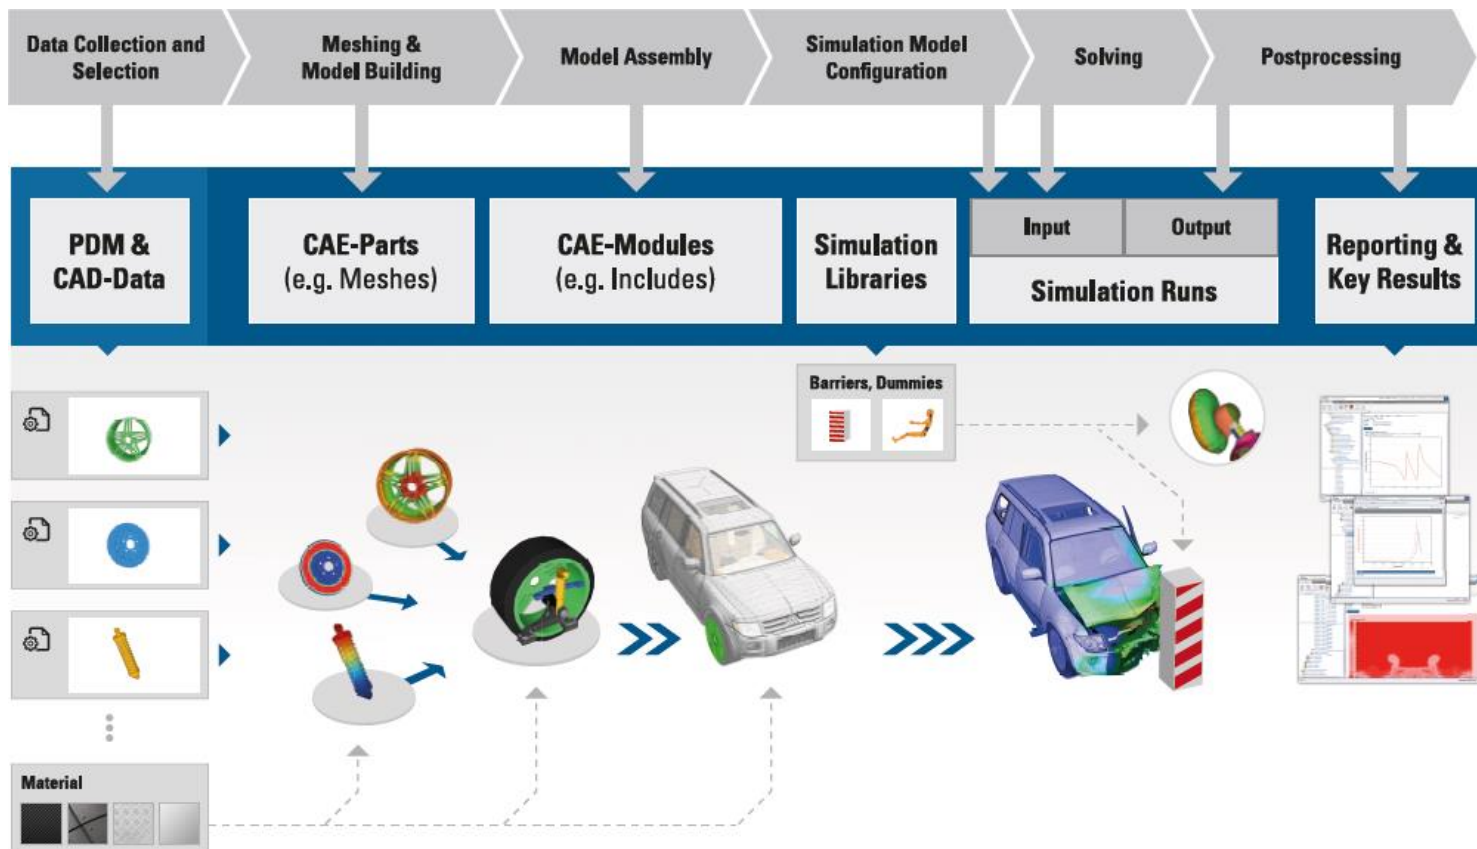

- ✓ **CAPTURE** the knowledge of simulations
- ✓ **KEEP** simulation results accessible (compliance)
- ✓ **REDUCE** simulation data (delete rules)
- ✓ **PROTECT** the company IP
- ✓ **INCREASE** engineering capacity & efficiency
- ✓ **IMPROVE** simulation quality

PDTEC

P|D|Tec.

CONCLUSIONS

Accurate simulation results

→ Efficient model creation, fast/accurate results

Proper process description and definition

→ Efficient integration of simulation tools

Manage data during process

→ Efficient data management and traceability
